

ServSwitch DT Low-Profile KVM Switch

The low-cost, low-profile
two- and four-port KVM switch.

FEATURES

- » 1920 x 1440 maximum resolution.
- » Push-button or hotkey switching.
- » Plug-and-play—no configuration.
- » Great for desktop users who require access to multiple computers.
- » Space-saving design eliminates desktop clutter in small and home offices.
- » Supports Microsoft® operating systems.
- » Easy port selection by hotkeys or front-panel button. Front-panel LEDs make the active port easy to identify.
- » AutoScan function enables port scanning at 3-, 8-, 15-, or 30-second intervals.
- » Supports all standard VGA resolutions from 640 x 480 to 1920 x 1440.
- » Supports standard keyboard layouts up to 104 keys and Microsoft IntelliMouse® or compatible mice.
- » Robust keyboard and mouse emulation to prevent lockups.

OVERVIEW

Access, control, and reboot two or four IBM® computers using just one PS/2® keyboard, video, and mouse with the [ServSwitch™ DT Low-Profile KVM switch](#) from Black Box.

Measuring less than an inch high, this compact switch is a great fit for crowded workstation areas. And because all CPU cables connect at the rear, you have even more free space on your desktop.

To switch between KVM channels, use either the top-panel buttons or a hotkey sequence. When you switch using a button, the corresponding top-panel LED lights to indicate which port is selected. Or you can set the [ServSwitch DT Low Profile](#) to switch between ports automatically with its AutoScan function.

The [ServSwitch DT Low Profile](#) works with most Windows® operating systems, and it draws its power from the interface.

Why Buy From Black Box? Exceptional Value. Exceptional Tech Support. Period.

Recognize any of these situations?

- You wait more than 30 minutes to get through to a vendor's tech support.
- The so-called "tech" can't help you or gives you the wrong answer.
- You don't have a purchase order number and the tech refuses to help you.
- It's 9 p.m. and you need help, but your vendor's tech support line is closed.

According to a survey by *Data Communications* magazine, 90% of network managers surveyed say that getting the technical support they need is extremely important when choosing a vendor. But even though network managers pay anywhere from 10 to 20% of their overall purchase price for a basic service and support contract, the technical support and service they receive falls far short of their expectations—and certainly isn't worth what they paid.

At Black Box, we guarantee the best value and the best support. You can even consult our Technical Support Experts before you buy if you need help selecting just the right component for your application.

Don't waste time and money—call Black Box today.
