Wallmount Swing Bracket

Get convenient access to the back of your components.

FEATURES

» Provides 6U of convenient wallmount racking space.
» Weight capacity of 75 pounds.
» Constructed of 14-gauge welded steel.
» 12-24 tapped holes for rackmounting.
» The Hinged Panel (RM098, included with the Wallmount Swing Bracket) enables you to swing out rackmount components. It can be mounted to swing left or right.
» Customize the Wallmount Swing Bracket (RM095A) or the Wallmount Bracket (RM096A) by adding the Adjustable Shelf (RM097) or Hinged Dust Cover (RM099).

OVERVIEW

The BLACK BOX® Wallmount Swing Bracket is the most convenient way to wallmount a patch panel or other network components. Standard 19" rails with 12-24 holes hold equipment up to 6U high. The bracket measures 10.9"H x 19.5"W x 9.5"D and provides enough depth for you to mount even oversized components.

The Hinged Panel (included with the Wallmount Swing Bracket) enables you to easily swing out components to access cables or DIP switches. The quick-release, spring-loaded thumbscrews mean no tools are required. Or, for components that don't need rear access, you can order the Wallmount Bracket by itself.

The optional Adjustable Shelf provides a handy spot for tools or for equipment that's not rackmountable. You can set the shelf from 2" to 6" above or below the bracket. To protect your components, order the Hinged Dust Cover. This light-weight aluminum shield lifts up easily when you need to access components.

TECH SPECS

Why Buy From Black Box? Exceptional Value. Exceptional Tech Support. Period.

Recognize any of these situations?

• You wait more than 30 minutes to get through to a vendor's tech support.
• The so-called "tech" can't help you or gives you the wrong answer.
• You don't have a purchase order number and the tech refuses to help you.
• It's 9 p.m. and you need help, but your vendor's tech support line is closed.

According to a survey by *Data Communications* magazine, 90% of network managers surveyed say that getting the technical support they need is extremely important when choosing a vendor. But even though network managers pay anywhere from 10 to 20% of their overall purchase price for a basic service and support contract, the technical support and service they receive falls far short of their expectations—and certainly isn't worth what they paid.

At Black Box, we guarantee the best value and the best support. You can even consult our Technical Support Experts before you buy if you need help selecting just the right component for your application.

Don't waste time and money—call Black Box today.
