Multiview KVM Switch

View and control up to four CPUs and monitors simultaneously, in real time with the 4Site.

Quad-Screen Mode

Picture-in-Picture (PIP) Mode

Windows (Win) Mode

4Site

Real-time monitoring

Provides control and instantaneous viewing for up to four computers from one console.

Multiple switching options

Switching via hotkey, hotmouse, on-screen display, external program or API interface.

Four display modes

Choose between Quad-Screen, Full Screen, Picture-in-Picture, and Windows display modes.

Short reaction time

Ensures users can immediately address issues in mission-critical applications.

Windows Mode

With the 4Site Flex, all video sources can be displayed at once, and freely scaled and resized in Windows Mode.

USB peripherals support

Transparent high-speed USB 2.0 matrix switches peripherals to all connected computers.

Embedded digital audio

The 4Site Flex supports 7.1 Surround Sound via the HDMI interface.

Free tech support

Application engineering and 24/7 technical support, year-round.

" I wanted to take a moment to thank you for its excellent pre-sales support. Please keep up the good work. " Mark A. Davis, Lake Taylor Transitional Care Hospital
